Features

Custom Business Email

- name@yourcompany.com
- Virus & spam protection
- Webmail access
- IMAP & POP3 Compatible

Shared Contacts/Calendars/Tasks

- Share calendars & schedule meetings
- Set up projects, assign responsibilities
- Monitor project progress visually
- Create and share custom contact lists

Document Management

- Organize online for anywhere access
- Share & Collaborate with remote teams
- Manage changes with versioning
- Manage access with permissions
- Automatic backups

Share Outlook Data Without Exchange

Supercharge your Outlook. Instantly access your Outlook account online, share Outlook contacts, calendars or tasks, without any need for a cumbersome MS Exchange setup!

Discussion Forums

Spur communication and discussion within and across company boundaries - create unlimited discussion forums for teams, departments, partners or customers.

Opinion Polls

Make for a truly democratic system with opinion polls. Keep a finger on the pulse of employees, clients, and partners with simple customer surveys, employee polls and more.

Mobile Collaboration

- Push and wirelessly sync email, contacts, calendars and tasks
- Share and collaborate on business data right on your mobile

Exchange Alternative

Get enterprise class messaging without any hardware or software. Get business email, power Outlook or any other client, share tasks/contacts, calendars, or access and synch data on the web or any mobile device!

More Features

Project Management

Manage multiple globally scattered project teams. Its all your teams need to work remotely - create tasks, set responsibilities & time, work on files & more, from any PC, Mac or mobile!

Intranet Software Solution (Online Workspace)

Instantly set up a thriving company intranet with dedicated workspaces for teams, departments and employees, without any need for hardware or software.

Portal Customization

- Deep customization for individuals, teams, departments & customers
- Manage precisely who sees what with permissions
- Manage employees, management & customers all at the same time

Extranet Software Solution (Customer Facing Portal)

Impress and enhance relationships with branded and tailor made extranets for distributed teams, partners and clients for two way communication.

Modular Management

Different user groups within the same organization may have access to different applications – some may have access to email only while another group has access to email plus basic collaboration....etc.

Modular provisioning as per profile requirements

Example:

User A would only need email, calendar, contacts and tasks

User B would need email + shared folders

User C would require the whole suite

SharePoint Alternative

Get enterprise class messaging without any hardware or software. Get business email, power Outlook or any other client, share tasks/contacts, calendars, or access and synch data on the web or any mobile device!

Dedicated areas for individuals, teams, departments, customers

Custom Look, Feel, Behavior

- Drag and drop editor
- Upload logo
- Select layout
- Create entire web-pages with Site Publisher
- Collaborate with Wiki

More Value Props

Services & Upgrades

Storage

Each HyperOffice account comes with generous (5Gb/email as of now) disk storage.

For example, an account with 25 users will get a total of 12.5 GB of disk space.

We offer extra online storage space at competitive prices, in a simple pricing structure.

Extra Security: Secure Socket Layer (SSL) 128-bit Encryption available as an upgrade option for those customers interested in adding an extra layer of security to their online workplace.

Email Archiving: Companies can safeguard their email assets without having to set up any specialized software or servers. Potential benefits of email archiving for SMBs are as follows:-

- Secure, organize and backup critical business information
- Retrieve important corporate data when necessary
- Monitor company communications to enforce corporate policies
- Rapid discovery in response to legal requests or internal inquiries
- Regulatory compliance

Compliance:

HIPAA, Sarbanes-Oxley (SOX), FRCP, SEC and FINRA

Our email archiving solution allows SMBs to proactively be legally-compliant and prepare for regulatory requests.

Benefits

Save Significant Cost

With HyperOffice, you significantly reduce cost of ownership for an IT overload. No hardware costs, maintenance costs, or upgrading or servicing headaches

Improve Productivity

Increase the productivity, knowledge management, teamwork, and communication capabilities of your business and your team.

Stay With the Tools You Use & Love

HyperOffice empowers you to use your legacy software that you and your team are tuned to. Works with Outlook, Mobiles, Windows and MAC

Microsoft SharePoint & Exchange Alternative

Shy of Microsoft Exchange and SharePoint because of the daunting costs of setting up hardware, and installing and maintaining these solutions?

HyperOffice brings you all the features of Exchange and SharePoint relevant to your business, rolled into a single, easy to use solution.

Modular Pricing

Modular provisioning as per customer requirements. Different user groups within the same organization may have access to different applications
